

SoSe 26 – MATA seminar – Valuation Day

Presentation schedule

EVENT	TIME
Intro	10:00-10:15
Group 1 presentation	10:15-10:35
Group 2 presentation	10:35-10:55
Group 3 presentation	10:55-11:15
Break	11:15-11:30
Group 4 presentation	11:30-11:50
Group 5 presentation	11:50-12:10
Break and course evaluation	12:10-12:25
Discussion on AI and wrap-up	12:25-13:00

Traton SE Valuation Case

Your task is to conduct a company valuation for the purpose of concluding whether Traton SE is currently overvalued or undervalued. You should use the valuation methods presented in *SoSe 26 – MATA valuation template.xlsx* that already contains key assumptions for you to rely on, such as ERP or baseline tax rate.

Information from Bloomberg, LSEG, and historical stock prices for the reference company and two peers are provided. If necessary, you shall search additional information independently. Further, *SoSe 26 – MATA valuation presentation.pptx* serves as a structural guideline for your presentation.

Once you have filled in the template, you can attempt to answer the following questions:

- A.1 – How does the different degree of debt and its structure across peers influence relative valuation compared to Traton?
- A.2 – Do synergies exist between the different business lines that constitute Traton Operations?
- A.3 – Are there differences between data points reported by Bloomberg and LSEG? Do these play a big role in the company's valuation?

Please, submit a maximum 10-page presentation including the cover slide in PDF format, including 2 additional slides describing DCF assumptions and further supplementary information that you think should be added for answering the additional questions.

Notes on the assignment:

- Begin with the DCF valuation, then move on to the multiples valuation. If you have time at the end, you can add your own WACC calculation and provide an answer to additional questions.
- Keep it simple: Calculations and assumptions need not be overly complex.
- You are encouraged to employ AI for the purpose of carrying out valuation and resolving any confusion you may encounter while working on the exercise and we are interested in hearing more about your experience with it.

Hints and tips:

- **You may need to find more data, but not all the provided data is relevant! Optimize your time to extract the necessary figures only.**
- **Are you displaying truly comparable data? What about currencies?**

The valuation is to be performed for the reference date of **June 30th, 2026** using current market data and corporate disclosures up to and including **Q1 2026**.

You may use all company reports and other available information up to this point of time.
